Media Partners

Bringing together the stakeholders in the value chain for Net Zero Building, Energy Efficiency, Building Technology, ESG and Smart City Development for the first time

Buildings and cities are critical to the transition to a net zero future, as they are responsible for about 50%+ of the energy consumption and about 40%+ of GHG emissions. Cities are at the heart of responding to climate change – action taken at a city scale to build greater resilience and to decarbonize has the power to create healthier, more equitable places at the same time.

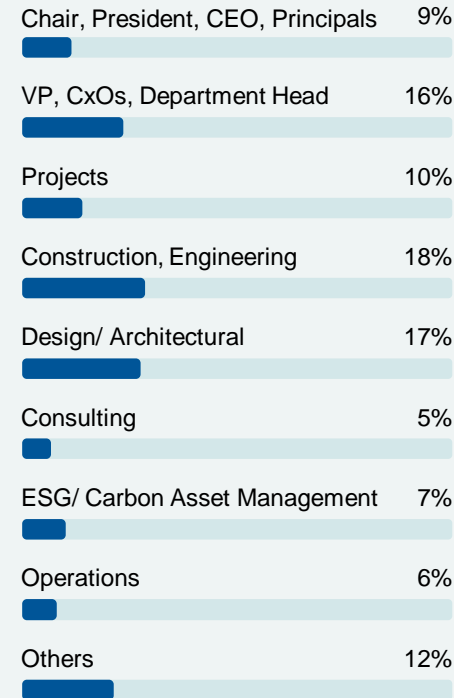

The Philippines' climate goal and net zero targets are focusing leaders' minds on decarbonization. Building and city sectors will be increasingly expected to take action to reduce emissions while also building resilience and truly sustainable cities. Now is the time to transform how our cities are planned, designed, and operated.

Net Zero Building/Net Zero City Summit Philippines 2023 is the biggest and most inclusive conference in the Philippines' building design, construction, and city planning sectors. It is designed to keep participants at the forefront of the industry by covering sustainability, resilience, health, and wellness in the spaces where we live, work, learn, and play.

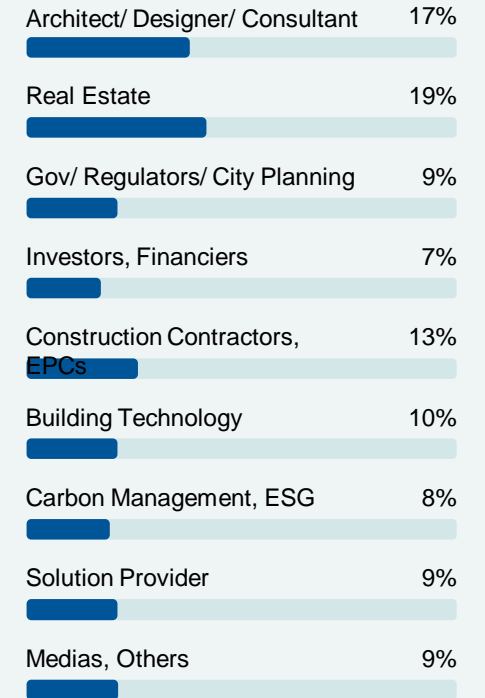

You will meet 500 leaders, decision makers, climate advocates, and solution providers from government bodies, city planning agencies, real estate firms, designers, architects, construction companies, energy companies, building technology companies, carbon asset management companies, investors, and financiers from the Philippines and around the world. Over the course of two days, you will attend informative presentations, debates, and discussions on climate risks, country climate goals, net zero advocacy, market transformation, sustainable urban planning, design innovations, net zero buildings, ESG, technology solutions, carbon asset management, and many other topics.

The event also includes an exhibition of the world's leading technological innovations in urban planning, carbon management, and building solutions. It is an ideal setting for connecting with business partners, products, and solutions for your projects.

Subject: **WORLD NET ZERO BUILDING & NET ZERO CITY SUMMIT
PHILIPPINES 2023**

Dear **Ms. Apuad**:

Greeting from the Department of Energy!

This refers to the partnership between DOE and ESCOM Group of Events to be the Event Partner for the World Net Zero Building and Net Zero City Summit Philippines 2023 to be held on 10-11 January 23 at Dusit Thani Manila Philippines.

The DOE's vision in powering up Filipino communities through clean, efficient, robust, and sustainable energy systems that leads to the use of efficient technologies, renewable energy, and passive design is towards achieving a Net Zero Building and City.

Relative thereto, the following are the items agreed upon in the partnership:

Department of Energy

1. Brand the event banner/poster/text description through its website or other promotional channels
2. Recommend its members/partners/client in energy industry to participate the event

ESCOM Events

1. Recognize and brand DOE as a Strategic Partner for the Net Zero Building & Net Zero City Summit Philippines 2023
2. Include DOE logo on all marketing materials (e.g., Website, event brochure/booklet, social media pubmats, banners, etc.)
3. Extend ten (10) VIP passes for DOE delegates
4. Insert an A5 size page for DOE in the official Event Book

Moreover, the DOE is please to be your event partner for the World Net Zero Building and Net Zero City Summit Philippines 2023, hence, we are committed towards a Net Zero Building and City in the Philippines.

Should you have further queries or clarification regarding on this matter, please feel free to contact the EE&C Program Management and Technology Promotion Division (EPMPD) at telephone no. (02) 8479-2900 local 214 or send an email to doe.epmpd@gmail.com.

Thank you.

Very truly yours,

FELIX WILLIAM B. FUENTEBELLA
Undersecretary

Key benefits of Attending

Learn about Net Zero building in the Philippines, as well as Net Zero city initiatives and opportunities

Discover how to implement and deliver a Net Zero building project

Discover the latest trends in Building Carbon Asset, Carbon Management, and Sustainability

Learn about ESG/ESG Investments and its impact on buildings, organizations, and cities

Understand City Waste Management & Circular economy

Learn about Innovative Solutions in high-performance, energy efficient buildings

Discover how to reduce Energy Consumption in commercial facilities whilst enhancing Operational Productivity

Discover how international and local Net Zero Certification can yield returns for new developments and existing building reuse

Understand the significance of Embodied Carbon Reduction Efforts on your Sustainable Building Value Propositions

Discuss the opportunity for buildings to be transformed into microgrids, enabling the mass adoption of Renewable Energy and electric vehicles

Speakers 1/3

Patrick Aquino
Director,
Energy Utilization Management Bureau -
Department of Energy

Monalisa Dimalanta
Chairperson,
Energy Regulatory Commission

Sharon Ocampo-Montañer
Director, Market Operations Service (MOS),
Energy Regulatory Commission

Sec. Robert E.A. Borje
Vice Chairperson and Executive Director,
Climate Change Commission

Joy Esther Gai
Programmes Head for Asia Pacific Region,
World Green Building Council (WorldGBC)

Mario Lawrence Suelto

Director, Climate & Sustainability,
Deloitte

Noel Argamosa
Head of Network Energy, Environment, Health
& Safety,
Smart Communications Inc.

Agenda – AM Session

Time	Topic
0830	Opening Remarks and Welcome Address Conference Chair, to be announced
0900	Keynote Getting a Grip on Climate Change in the Philippines Secretary Robert E.A. Borje , Climate Change Commission, Vice Chairperson and Executive Director
0925	Keynote Why electrical Engineering is Fundamental in Green Buildings Patrick Aquino, Director, Energy Utilization Management Bureau, Department of Energy
0950	Panel Discussion Building resilient, net zero, and sustainable cities Raymond Rufino, Chief Executive Officer, NEO (<i>Moderator</i>) Noel M. Argamosa, Head of Network Energy, Environment, Health & Safety, Smart Communications Inc. Salvador Tan, AVP-Architect & Urban Planner, Ayala Land, Inc. Ricardo Lagdameo, President, Damosa Land, Inc. (DLI) Chaye Cabal-Revilla, EVP-Chief Finance Officer & Chief Sustainability Officer, Metro Pacific Investments Corporation Arch. Felino "Jun" Palafox, Fellow, Country Leader CTBUH, Principal Architect – Urban Planner & Founder, Palafox Associates
1035	Morning Tea Break

Time	Topic
1105	Presentation Off-Balance Sheet Capital Flows to Decarbonize Existing Building Stock in Cities While green building initiatives and policies are transforming new buildings, the building sector will need innovative capital sourcing and technology delivery models to retrofit energy efficiency upgrades in existing building stock in major urban centers. Off-balance sheet project equity flowing through energy service company (ESCO) performance contracts will accelerate the NZE pathways of existing C&I building assets. Alexander Ablaza, President, Philippine Energy Efficiency Alliance, Inc. (Pe2)
1130	Presentation Slot Reserved for Acardis To be announced
1155	Presentation ABCs of Net Zero Buildings: Demystifying Net Zero for Emerging Markets Green buildings in the Philippines are an underdeveloped but rapidly growing market. The Philippines is one of the most vulnerable countries to climate change and its emissions have grown steadily, making the country an "emerging emitter"—what a World Bank Group report defines as low- and middle-income countries whose annual growth rate of emissions exceeds their GDP growth. The property sector is a significant contributor to these emissions. Ambitious emissions reduction targets have been made by a few leading property developers, but there's widespread confusion surrounding net zero buildings and how to achieve them. This session proposes a straightforward net zero definition and pathway that property developers, big and small, can follow. Angelo Tan, International Finance Corporation, World Bank Group Country Lead for the Philippines - Green Resilient Buildings Programs
1220	Lunch Break

Venue: Dusit Thani Manila Hotel

Situated in the heart of the financial capital, the hotel boasts easy access to all the business, entertainment, and recreational options Makati has to offer. A choice of 500 exquisite rooms and suites in Makati city hotel embody a delightful blend of Filipino geniality and gracious Thai hospitality, while world-class [dining](#) destinations and full-service facilities ensure business and leisure guests are completely at ease.

Floorplan

Our Recent Event Partners & Sponsors:

TOP REASONS TO ATTEND

01 MEET

Meet over 2,000 CIOs/COOs/CEOs from the top businesses in SE Asia

02 EDUCATE

Educate the market and business decision makers through presentations and panel discussions

03 SHOWCASE

Showcase your solutions, cases studies, project references directly to the corporate buyers

04 EXPOSE

Expand your net zero solutions/green sustainable solutions to the decision makers of the corporate buyers

05 GENERATE

Generate leads(buyers)that are actually sourcing digital innovations/solutions for their businesses

06 SELL

Present yourself and make sells with those project owners

07 CONNECT

Connect with your peers, partnership, potential customers via this event

08 INSPIRE

Get inspired by our refreshing presentations and inspire your potential clients by presenting your solutions

An important aspect of the conference is that stakeholders are taking part and encouraging the government to accelerate the project development and permitting process. In addition, improved policies and the need for greater alignment with the development of new technologies and improved equipment.

About the Organizers

Global Zero Carbon Partnership is a community that Escom initiated, it is designed to connect the Green and Sustainable Development researchers, policy makers, advocates, investors, innovators, and solutions providers globally to promote the green transformation towards a Net Zero world. Currently, the community have attracted some 10,000+ members and still rapidly growing. Our members are constituted by meteorological science, energy and energy storage, clean energy, energy conservation and emission reduction technology, low-carbon and zero-carbon technology, industrial manufacturing, construction, transportation, agriculture, forestry sectors.

Through hosting knowledge sharing events, we promote carbon neutrality and promote the implementation of low-carbon environmental protection concepts and technologies.

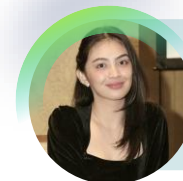

<https://gzcp.org/>

Escom Events provides business executives with tailored practical conferences, large-scale events, topical seminars, keeping them up-to-date with industry trends, technological developments, and the regulatory landscape. Escom Events conferences are market-leading "must attend" events for their respective industries. All our events are designed for cooperate vendors to reach their prospects and explore new business opportunities at our "One Stop Shop" Summit.

We bring together the government authorities and investors, developers, operators, and all other types of stakeholders in a common platform to conduct 2-3 days exclusive workshop on each specific industry. The event programs address the most pressing industry strategic topics and give answers to concrete issues and even technical perspectives.
